Neural Nets (textgenrnn)

Neural Nets (textgenrnn)

Idea: train a neural network on our corpus of headlines, and ask it to generate new ones

SYSTEM PROMPT
(HUMAN-WRITTEN)

In a shocking finding, scientist discovered a herd of unicorns living in a remote, previously unexplored valley, in the Andes Mountains. Even more surprising to the researchers was the fact that the unicorns spoke perfect English.

MODEL
COMPLETION
(MACHINE-
WRITTEN, 10 TRIES)

The scientist named the population, after their distinctive horn, Ovid's Unicorn. These four-horned, silver-white unicorns were previously unknown to science.

Now, after almost two centuries, the mystery of what sparked this odd phenomenon is finally solved.

Neural Nets (textgenrnn)

Neural Nets (textgenrnn)

Pros

- Able to generate really good headlines (uh, maybe with more data and time)
- Easy to get going - pour the data and wait!

Neural Nets (textgenrnn)

Pros

- Able to generate really good headlines (uh, maybe with more data and time)
- Easy to get going - pour the data and wait!

Cons

- We don't have much control over what gets generated.
- It's hard to appreciate the process.
- Hard to angle towards humour or a 'message'.

Markov Chains

Markov Chains

Pros

- Simple and quick to code, but relatively good quality nonetheless.
- Easier to explain, easier to appreciate!

Markov Chains

Pros

- Simple and quick to code, but relatively good quality nonetheless.
- Easier to explain, easier to appreciate!

Cons

- Hard to predict whether it'll generate gold or... nonsense.
- We still can't control much of the tone or direction of the bot.

Part-Of-Speech Analysis

Part-Of-Speech Analysis

Pros

- Lots of control, letting us mix data like ingredients, and focus it into structures.
- Very easy to explain and unpack to others.

Part-Of-Speech Analysis

Pros

- Lots of control, letting us mix data like ingredients, and focus it into structures.
- Very easy to explain and unpack to others.

Cons

- Labour-intensive: a lot of work involved in authoring, can run out of content.
- Highly curated which can reduce novelty (not always - but it takes experience and luck)

There's no “right answer” in AI

As the Film Ends
@endingsummary

Then the puppy urinates on him.
